**Subject:** RE: Draft Fill WBZ Trench Design Evaluation Report

Dana – at your request we have had a professional engineer and geologist registered in Oregon stamp the report—they both were responsible for the report preparation. Although we are accommodating this request, please note that the Oregon PE regulations require that “every final document including drawings, specifications, designs, reports, narratives, maps and plans issued by a registrant shall be stamped with the seal and signed by the registrant.” The Fill WBZ is a draft alternatives evaluation presented for your review and is not a final report of any kind. It does not contain final drawings, specifications, or designs and does not include the detail that would be necessary to implement or construct any of the alternatives evaluated in the report.

Please use the same FTP log-in info as before to access the stamped report.

Thanks  
John
